

Installation

Note: In production, please use the `--keep-generated` option.

Zip file

1. Download the zip file for your extension.
2. Unzip the zip file and copy the contents to `app/code/ArmMage`.
3. Enable the module by running the following command from the Magento root directory:

`php bin/magento module:enable ArmMage_ExtraValidationCustomerRegistration`

4. Apply di compile for class generation by running the following command:

`php bin/magento setup:di:compile`

Note: In production, use the **`--keep-generated` option.**

5. Flush the cache by running the following command:

`php bin/magento cache:flush`

6. The extension is now installed and ready to use.

Note: It's always a good idea to test the extension thoroughly after installation to ensure that it's working correctly and not causing any conflicts with other extensions or the Magento core.

Support:

For any questions or concerns, please contact the support team with email or the module's official website.

Enjoy enhanced customer tracking and management with our Magento module!
